

The decision to air an attack ad aimed at an aspirant to high government office just weeks before an election, is a clear violation of FCC regulations and perhaps Federal law.

I am one citizen that requests to have equal representation of an opposing view from Sinclair Broadcasting, which is being aired as something other than what it is... this is deception. Airing an attack on John Kerry is an example of biased pandering to one political party over another... is the granting of access to public airwaves a right for a company to spin the Republican Party's line to an uninformed public with no disclaimer.

Please do your job and prevent this grave injustice to democracy. --H G Gideon
